

# DNA Sequencing Products 2017 Global Market Expected to Grow at CAGR 18.75% and Forecast to 2021

*The analysts forecast the global DNA sequencing products market to grow at a CAGR of 18.75% during the period 2016-2020.*

PUNE, INDIA, December 26, 2017

## Global [DNA Sequencing Products Market](#)

### Description

WiseGuyReports.Com adds" Global DNA Sequencing Products Market 2016-2020 "Research To Its Database.

DNA sequencing is categorized into first-generation, second- and next-generation, and emerging technologies. Emerging DNA sequencing technologies are cost-effective and offer more rapid and accurate results than other generation technologies. These technologies find application in the areas of diagnostics, drug and biomarker discovery, personalized medicine, and agriculture and animal research.

Since its introduction in 2010, next-generation DNA sequencing has developed rapidly. It offers insights into various areas of science, particularly healthcare and genomic research. However, available DNA sequencing technologies create significant financial complications for laboratories, increasing the pressure on maintaining the expenses for biomedical research. This has increased the demand for less expensive instruments and the need for cost-effective procedures. It has also increased the emphasis on enhancing aspects of sample preparation and expanding the simplicity of the work process for greater proficiency.

### Covered in this report

The report covers the present scenario and the growth prospects of the global DNA sequencing products market for 2016-2020. To calculate the market size, we consider revenue generated from the sale of equipment, reagents, and consumables used in DNA sequencing.

## [sequencing-products-market-2016-2020](#)

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

The Global DNA Sequencing Products Market 2016-2020, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- Illumina
- Thermo Fisher Scientific
- Roche Diagnostics
- Pacific Biosciences

Other prominent vendors

- AC-Gen Reading Life
- Agilent Technologies
- Beckman Coulter
- Cofactor Genomics
- DNA Link
- Eurofins MWG Operon
- Expression Analysis
- GE HealthCare
- Ototgenetics
- Oxford Nanopore

Market driver

- Development of rapid sequencing platforms
- For a full, detailed list, view our report

Market challenge

- Limitations of DNA sequencing technology
- For a full, detailed list, view our report

Market trend

- Advances in personalized medicine
- For a full, detailed list, view our report

Key questions answered in this report

- What will the market size be in 2020 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?
- What are the market opportunities and threats faced by the key vendors?
- What are the strengths and weaknesses of the key vendors?

## Table of Contents -Major Key Points

### PART 01: Executive summary

- Highlights

### PART 02: Scope of the report

- Market overview
- Top-vendor offerings

### PART 03: Market research methodology

- Research methodology
- Economic indicators

### PART 04: Introduction

- Key market highlights
- Benchmark for sequencing companies

### PART 05: Market landscape

- Market overview
- Market size and forecast
- Five forces analysis

### PART 06: Types of sequencing technology platforms

- Illumina synthesis
- Ion semiconductor sequencing
- Sequencing by ligation
- Pyrosequencing
- Single molecule, real-time (SMRT) sequencing

### PART 07: Reimbursement and coverage

- Payer perspective: Validating next-generation sequencing
- Coding
- Challenge for payers in US
- Next-generation tumor sequencing
- Conclusion

### PART 08: Regulation of next-generation sequencing tests in US

- Analytical performance of next-generation sequencing tests
- Assessing clinical performance of next-generation sequencing tests

### PART 09: Market segmentation by product

- Global DNA sequencing products market for reagents and consumables
- Global DNA sequencing products market for equipment

PART 10: Market segmentation by end-user

PART 11: Geographical segmentation

- DNA sequencing products market in Americas
- DNA sequencing products market in EMEA
- DNA sequencing products market in APAC

PART 12: Market drivers

- Understanding of human genomics
- Development of rapid sequencing platforms
- Decline in DNA sequencing costs
- Incidence of chronic diseases

PART 13: Impact of drivers

PART 14: Market challenges

- Limitations of DNA sequencing technology
- Unfavorable reimbursement scenario
- Limited skilled medical professionals

PART 15: Impact of drivers and challenges
