## [Forage Seed Market 2017](#)

Forage seeds are those seeds which are grown to be utilized by grazing or harvesting as a whole crop. Primarily plant breeders plant different forages seeds, which are primarily harvested as livestock feed. This is because these plants provide the optimal amount of nutrition to livestock. Farmers need to consider several factors while sowing and maintaining pastures, like sowing seeds and growing plants that have high protein content, are rich in minerals and vitamins, and can improve soil fertility through nitrogen fixation.

The analysts forecast the global forage seed market to grow at a CAGR of 9.62% during the period 2017-2021.
