The telecom services revenue in Belgium is estimated to grow at a CAGR of 2.3% during 2017-2022, primarily driven by rising smartphone adoptions, increasing OTT consumption as well as high-speed LTE connectivity. Mobile data will be the largest revenue-contributing and fastest-growing segment, followed by fixed broadband. Both are estimated to grow at a CAGR of 7.5% and 2.5%, respectively, during 2017-2022. Going forward, operators should continue to focus on network investments and upgrades, particularly expanding 4G networks, and invest in 5G trials. Government plans to extend at least 30Mbps broadband speed to 100% of households by 2020 will open ample opportunities for operators in the market in coming years.

The Country Intelligence Report provides in-depth analysis of the following -

- Regional context: telecom market size and trends in Belgium compared with other countries in the region.
- Economic, demographic and political context in Belgium.
- The regulatory environment and trends: a review of the regulatory setting and agenda for the next 18-24 months as well as relevant developments pertaining to spectrum licensing, national broadband plans, number portability and more.
- A demand profile: analysis as well as historical figures and forecasts of service revenue from the fixed telephony, broadband, mobile voice, and mobile data markets.
- Service evolution: a look at changes in the breakdown of overall revenue between the fixed and mobile sectors and between voice, data and video from 2016 to 2021.
- The competitive landscape: an examination of key trends in competition and in the performance, revenue market shares and expected moves of service providers over the next 18-24 months.
- In-depth sector analysis of fixed telephony, broadband, mobile voice, and mobile data services: a

quantitative analysis of service adoption trends by network technology and by operator, as well as of average revenue per line/subscription and service revenue through the end of the forecast period.

- Main opportunities: this section details the near-term opportunities for operators, vendors and investors in Belgium's telecommunications markets.

Scope

- The overall telecom service revenue in Belgium will grow at a CAGR of 2.3% during 2017-2022, mainly driven by growth in the mobile data and fixed broadband segment.
