

Edmonton's Affordable and Accessible Eye Exams and Eye Health Centre for Two Dollars

OPT Clinic is Edmonton's premier optometry clinic by putting their money where their passion is. \$2 eye exams for as long as they can afford it!

EDMONTON, ALBERTA, CANADA, December 28, 2017 /EINPresswire.com/ -- OPT.Clinic opens a new eye health care clinic with emphasis on patient education through affordable and accessible eye care for all in Edmonton, Alberta, Canada.

OPT Clinic is a brand new local optometry and aims to end preventable eye issues, problems, and vision loss with proactive care. You can get your eye exam with our local optometrist for only \$2!

Alberta Health Care only covers vision care for what is medically necessary, and by the time a person requires treatment, it may be too late! Just like dental care, if you have regular check-ups and cleanings, you are able to catch things before they get worse, which could end up costing the patient more.

Here's how OPT. does it. Eye exams are \$100 and few people have insurance benefits that covers it every 2 years. As a result, eye health care is often pushed down on the priority list of expenditures; since the \$100 can be spent on groceries, gas, or other basic needs of life.

OPT. believes that having clear uncompromised vision is a basic need for everyone, no matter the socioeconomic status. To make eye health care accessible to all, OPT. offers eye exams at \$1 per eye. That's only \$2 per eye exam! Now there is no excuse to put such an important part of your daily life on the back burner.

Patient education is one of the highest priorities at OPT. No more walking in for an eye exam, having the optometrist ask "one or two", and walking out with a prescription. At this eye clinic, they make sure that the patient understands every step of the eye exam process and why certain tests are being done.

OPT. offers the option of Hoya lenses, which is the clearest and latest lens manufacturing technology on the market. OPT. believes in providing accessible refractive error correction through high quality optics and eyeglasses.

This eye health clinic offers evening and weekend appointments to fit around a busy schedule, walk-in appointments, same day service with an in-house lab to fit your prescription while you wait*, and fashionable brand name eyewear as well as in house brands to suit your budget and lifestyle.

*depends on available stock that day
