About [Personal Safety Tracking Devices](#)

The personal safety tracking devices market through GPS technology is expected to post the fastest CAGR during the forecast period, owing to more benefits associated with it as compared with Bluetooth technology. One of the best advantages of using this technology is that it enables tracking from within a range of a kilometer to a different country. It also allows users to live stream the exact location of the user real-time. The availability of a wide range of GPS products is expected to contribute to the market growth during the forecast period.

Technavio's analysts forecast the global personal safety tracking devices market to grow at a CAGR of 12.66% during the period 2018-2022.
