About [Beverage Cans](#)

Beverage cans are used for different non-alcoholic beverages, such as CSD, energy drinks, and juices. It is observed that the popularity of metal cans is increasing among consumers. This is mainly because beverage cans have a better hermetic seal and good barrier against oxygen and sunlight, thereby retaining the taste of the beverage. The global beverage cans market is expected to grow on the back drops of factors such as increased need for metal cans and rise in consumption of energy drinks. There is an increased need for metal cans due to their various advantages such as higher mechanical strength and high quality of printing and decoration possible compared with other packaging solutions.

Technavio's analysts forecast the global beverage cans market to grow at a CAGR of 3.19% during the period 2018-2022.
