

Automotive Performance Engine Bearings 2017 Global Market Expected to Grow at CAGR 6.10 % and Forecast to 2021

WiseGuyReports.com adds "Global Automotive Performance Engine Bearings Market 2017-2021" reports to its Database.

PUNE, INDIA, December 29, 2017 /EINPresswire.com/ -- About Automotive Performance Engine Bearings

A bearing needs a different mix of properties: it is hard enough to resist wear but soft enough not to damage the shaft. The bearing also restricts any deposits or particles in the film of oil to

erode the shaft or the crank surface. It is a mixture of metals, which make a balance between hardness and softness. Bi-metal aluminum engine bearings are most recommended in factory-fit engines as these are lead-free and less expensive to produce than a tri-metal lead-copper bearing. The bi-metal bearings can last over 200,000 miles in most of the stock fitment cases; though the life of the bearing does depend on the maintenance of and quality of driving the vehicle.

Technavio's analysts forecast the global automotive performance engine bearings market to grow at a CAGR of 6.10% during the period 2017-2021.

Covered in this report

The report covers the present scenario and the growth prospects of the global automotive performance engine bearings market for 2017-2021. The report presents a detailed picture of the market by way of study, synthesis, and summation of data from multiple sources.

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

Technavio's report, Global Automotive Performance Engine Bearings Market 2017-2021, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- MAHLE
- King Engine Bearings
- Timken

Other prominent vendors

- Boca Bearings
- Dura-Bond Bearing Company
- ACL Distribution
- Daido Metal

Market driver

- Motorsports encourages adoption of performance products
- For a full, detailed list, view our report

Market challenge

- High-performance electric motors will penetrate performance vehicle segment
- For a full, detailed list, view our report

Market trend

- Aftermarket consumption of performance engine bearings
- For a full, detailed list, view our report

Key questions answered in this report

- What will the market size be in 2021 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?

You can request one free hour of our analyst's time when you purchase this market report. Details are provided within the report.

Table of Contents:

PART 01: Executive summary PART 02: Scope of the report

PART 03: Research Methodology

PART 04: Introduction

Market outline

PART 05: Market landscape

- Market overview
- Market size and forecast
- Five forces analysis

PART 06: Market segmentation by application

- Global automotive performance engine bearings market segmentation by application
- Global automotive performance engine bearings market by low to medium load application
- Global automotive performance engine bearings market by high to extreme load application PART 07: Geographical segmentation
- Global automotive performance engine bearings market segmentation by geography
- Automotive performance engine bearings market in Americas
- Automotive performance engine bearings market in EMEA
- Automotive performance engine bearing market in APAC

PART 08: Decision framework PART 09: Drivers and challenges

- Market drivers
- Market challenges

PART 10: Market trends

- Emergence of advanced technologies
- Aftermarket consumption of performance engine bearings

PART 11: Vendor landscape

- Competitive landscape
- Other prominent vendors

PART 12: Key vendor analysis

- MAHLE
- King Engine Bearings
- Timken
