CBN is a research company dedicated to

providing a balanced and objective view of customer satisfaction and service by small to mid-size companies. CBN research seeks out the exceptional customer service companies.

CBN was founded as an independent research and publishing company that strives to provide a voice to the consumer about those unheralded small businesses that deliver exceptional service and experiences.

CBN seeks out, rates and recognizes companies that are the hidden gems of communities. In the process, CBN removed the bias — both positive and negative — that is inherent in most ratings and reviews.

The result is a comprehensive, unbiased and accurate research-based rating that gives guidance to purchase decisions consumers make each and every day.

Mohs Micrographic Surgery is a specialized treatment for certain skin cancers. It combines the surgical removal of cancer with the immediate microscopic examination of tissue by the Mohs surgeon and specific mapping of the surgical site to accurately identify and remove the skin cancer. Mohs surgery is the most precise surgical method for skin cancer removal with the highest cure rate (up to 99%). The Cary Skin Center specializes in Mohs micrographic and reconstructive surgery.

For more information on our dermatologic surgeons at Cary Skin Center, interested parties can visit www.caryskincenter.com or call the clinic directly at 919-363-7546. Cary Skin Center is located at the

corner NC Highway 55 and High House/Green Level West Road in Cary, NC.

Cary Skin Center is a skin cancer treatment center specializing in Mohs Micrographic Surgery, located in Cary, North Carolina. Since 1998, Cary Skin Center has specialized in Mohs micrographic surgery which continues to be the most advanced and effective treatment procedure available for skin cancer.

About Cary Skin Center:

In 1998, Dr. Clark established the Cary Skin Center, a state-of-the-art outpatient surgical center specializing in Mohs Micrographic Surgery for the removal of skin cancer. Dr. Flynn joined the Cary Skin Center in 2001 and together they have successfully treated many thousands of patients in the Triangle and surrounding areas.

Because Mohs surgery is a highly complex and sophisticated surgical method, it requires extensive training. Dr. Clark, Dr. Flynn, Dr. Ayli and Dr. Ingraffea completed 1-2 year certified intensive training programs, including complex surgical cases and advanced reconstruction to become Fellows of the American College of Mohs Surgery. In addition, they offer over 60 years of combined Mohs surgery experience.
