

Rently Keyless Partners with Streamline Vacation Rental Software for Hassle-Free, Keyless Property Rental Experience

Partnership Enables Immediate Key Code Creation, Scheduling and Delivery at Time of Booking

BEVERLY HILLS, CA, UNITED STATES, January 4, 2018 /EINPresswire.com/ -- [Rently Keyless](#) today announced that [Streamline](#) Vacation Rental Software has integrated keyless property rental technology from Rently Keyless into its vacation rental software to simplify its property rental experience.

Rently Keyless allows property managers to eliminate the hassle of exchanging, tracking and even replacing lost keys by replacing keys with an electronic key code.

Through the partnership with Rently Keyless, Streamline Vacation Rental Software can instantly issue a unique, six-digit electronic key code for vacation property renters at the time of booking and automatically schedule the duration for the key code access. With the integrated solution, property managers need only enter information once into the Streamline application. If a key is needed, the application will communicate with the Rently Keyless Management Portal through an application programming interface (API).

“

For companies that manage a large number of properties, the coordination of keys is inefficient and time consuming – and a major drain on productivity”

Merrick Lackner

Streamline Vacation Rental Software can issue this electronic key code to renters via text message that unlocks the rental property’s keyless entry deadbolt. Streamline Vacation Rental Software can edit the access parameters via a computer or mobile app.

“For companies that manage a large number of properties, the coordination of keys is inefficient and time consuming – and a major drain on productivity,” said Rently Keyless Co-Founder, Merrick Lackner. “With Rently Keyless integrated

into Streamline Vacation Rental Software's booking software, property managers can skip the hassle of key coordination and reduce HVAC costs, while focusing their efforts on delivering an exceptional customer experience."

"Our customers manage a great deal of vacation rental properties and have a number of people that may need access at any given time, whether it be renters, housekeeping or maintenance and keeping track of keys for each, while also ensuring the security of the property and renters, is nearly impossible," said Jeremy Pearcy of Streamline. "We're pleased to partner with Rently, as eliminating keys gives our customers great flexibility in access control and renters enjoy the simplified process as well."
