

# Simply NUC® announces new Hades Canyon NUC with 8th Gen Intel i7 and AMD Radeon graphics on display at CES 2018.

*The new NUC models are a result of Intel and AMD's recently announced collaboration enabling real time power sharing across CPU and GPU for optimal performance.*

LAS VEGAS, NV, UNITED STATES, January 8, 2018 /EINPresswire.com/ -- AUSTIN, Texas and Las Vegas, NV— [Simply NUC, Inc.](#), an Intel® Platinum Partner and leading Intel NUC integration company based in Round Rock, Texas, today announced it will be showing off the latest, and by far the most powerful NUC ever, at CES booth 51673 this week. Codenamed Hades Canyon and powered by the innovative new 8th Gen Intel® Core™ i7-8809G and i7-8705G processors, these incredibly powerful new NUCs bring together high-performance Intel Core H-series processors, second generation High Bandwidth Memory (HBM2) and a custom-to-Intel third-party discrete graphics chip from AMD's Radeon Technologies Group – all in a single processor package. The company is also taking [pre-orders](#) on its US and Europe based websites.

“We now have a NUC for nearly every application, from low end to the very highest demanding use cases” said Chuck Abdouch, CTO of Simply NUC, “These new high-end NUCs with discrete graphics will excel in applications previously out of reach, such as high-end gaming, virtual reality (VR) applications, high-end CAD, movie quality video rendering and virtualized servers. They can also run up to 6 4k@60Hz displays right out of the box”.

“Our collaboration with Intel expands the installed base for AMD Radeon GPUs and brings to market

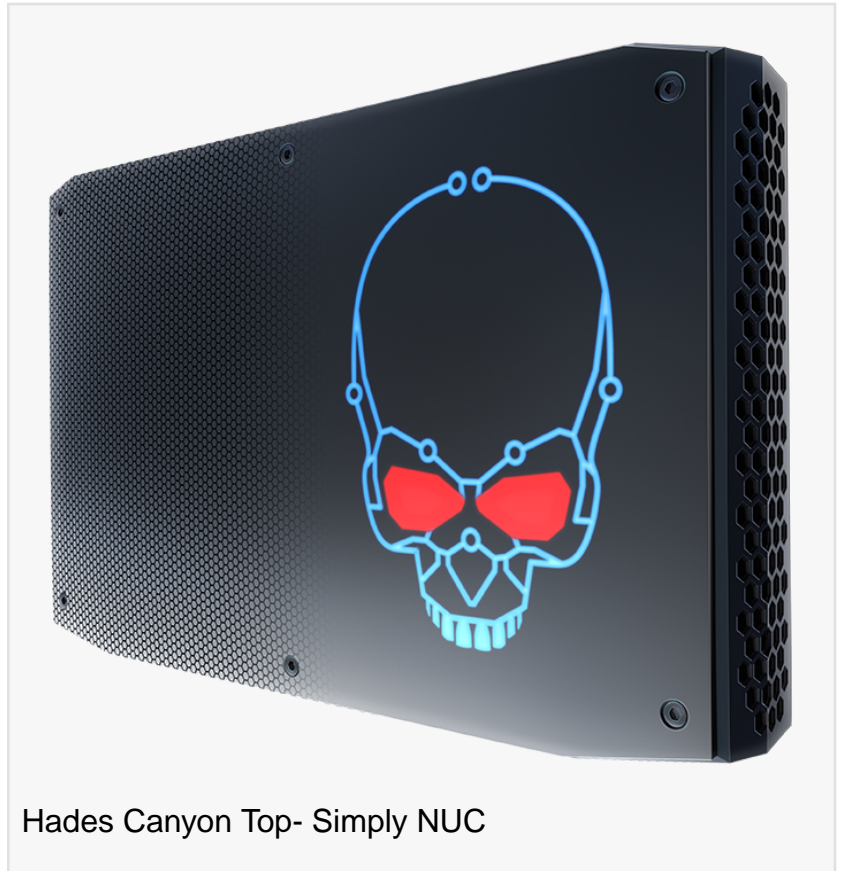

a differentiated solution for high-performance graphics,” said Scott Herkelman, vice president and general manager, AMD Radeon Technologies Group. “Together we are offering gamers and content creators the opportunity to have a thinner-and-lighter PC capable of delivering discrete performance-tier graphics experiences in AAA games and content creation applications. This new semi-custom GPU puts the performance and capabilities of Radeon graphics into the hands of an expanded set of enthusiasts who want the best visual experience possible.”

Some of the notable new features in the new Hades Canyon Intel NUCs include:

- 8th Generation Intel Core™ i7 Processors with Discrete AMD Radeon RX Vega M Graphics
- Front and Rear full-size HDMI 2.0a (4K @ 60Hz)
- Up to 32GB DDR4-2400
- 2x rear Thunderbolt™ 3 (40Gbps)
- 4x USB 3.1 Gen 2 (10Gbps) (3 on Type-C and 1 on Type-A connectors)
- 5x USB 3.0 (5Gbps) Type-A connectors with one Charging Port (2.1amps)
- 2x DisplayPort 1.3 via USB-C™ connector
- 2x DisplayPort 1.3 with MST for up to 3 monitors per connector
- 2x Intel® 10/100/1000 Mbps Ethernet Ports (Server drivers available)
- 1x Digital Audio (7.1 Surround Sound) accessible on either mDP or either HDMI connectors
- 2x HD Audio ports, supporting both a Headset and a Line-Out/TOSLink

Hades Canyon Top- Simply NUC

Hades Canyon NUC models include:

- NUC8i7HVK (100W 8th Gen Intel® Core™ i7-8809G with Radeon RX Vega M GH GPU)
- NUC8i7HNK (65W 8th Gen Intel® Core™ i7-8705G with Radeon RX Vega M GL GPU)
