A content distribution network or content delivery network (CDN) is a system distributed network that delivers webpages or different web content data across various geographical locations. Rising demand for high-performance web services and real-time content have accelerated growth of the market for content delivery network. Moreover, increasing inclination towards mobile browsing is one of the major factors accelerating demand for CDN. Increasing mobile data traffic, increases growth of the mobile-based content, in turn, accelerating the demand for content delivery network. According to Coherent Market Insights, in 2016, the mobile data traffic grew 63 percent from 2015. In 2016, the global mobile data traffic reached 7.2 exabytes per month from 4.4 exabytes per month in 2015. By 2021, the global mobile data traffic is projected to reach up to 49 exabytes per month. Moreover, increasing number of smartphone users globally is also fueling the demand for content delivery network devices. According to Coherent Market Insights, in 2016, global mobile devices and connections reached to 8.0 billion, from which smartphones held 45 percent share, representing 81 percent of the total mobile traffic.
