

Voith chooses intergator as Google Site Search alternative

Replacement of Google Site Search by intergator on voith.com realized in 3 weeks

DRESDEN, GERMANY, January 10, 2018 /EINPresswire.com/ -- The [web search](#) on voith.com is now carried out by [intergator](#) of interface projects GmbH from Dresden.

Caused by Google's termination of its website search in December 2017, Voith was looking for a powerful [GSS alternative](#).

The decision was made for intergator as search solution for voith.com, Voith's international internet portal.

The GSS replacement by intergator was implemented within 3 weeks from project start to live launch. The web search of Google has been replaced 1:1 by intergator in appearance and functionality. In addition to a search on many microsites and country pages, the full-text search enables a search with international characters. The provision of a second instance ensures failover.

With the decision for interface projects GmbH, a provider was selected with proven great expertise in intelligent web search.

About interface projects GmbH

interface projects GmbH is a leading German company offering intelligent enterprise search and information management solutions with its product intergator. Regardless of industry and size, intergator supports intelligent information access in any organization. Content from various data sources is aggregated and analyzed across applications and systems.

About intergator by interface projects GmbH

intergator is an intelligent cross-application search engine, knowledge management and analytics platform based on machine learning. intergator is offered as software and as appliance solution. Serving as a single point of access intergator unlocks valuable content, whether it exists in file servers, emails, websites, databases, cloud content, SharePoint, CRM, ECM, PLM, ERP (SAP), or any other data source. It allows users to gain access to all essential data inside and outside their organization on any platform or device, instantly and securely. Being more than a universal search tool, the intergator social dashboard is a personalized interface and information cockpit, tailored to share information. intergator has proven to be an extremely efficient tool as it allows users to navigate within search results and to limit or extend these upon needs. Moreover, intergator expands on a keyword search and provides powerful algorithms, interrelations and social media monitoring solutions.
