PUNE, INDIA, January 11, 2018 /EINPresswire.com/ --

[Automotive Curtain Airbags Market 2017](#)

Curtain airbags are manufactured like other airbags. The major differences between them are in terms of structure, size, and surface area. The curtain airbags usually have a larger surface area. The main components of the curtain airbags are fabric coated with lubricating powder, the sensor module, and the gas inflator. The frontal airbag mechanism functions through communication between deceleration sensors placed near the vehicle headlight, an ECU (electronic control unit), and the airbag deployment system mounted on the steering wheel.

The analysts forecast the global automotive curtain airbags market to grow at a CAGR of 6.60% during the period 2017-2021.
