

Bouquet at Valtech Innovation Lab 2018

Interactive space to engage with AI-powered chatbot, Aristotle

LOS ANGELES, CA, USA, January 14, 2018 /EINPresswire.com/ -- [Bouquet](#) joins an impressive list of startups in New York City on January 14-16, 2018 to participate in an innovation lab hosted by Valtech, a digital agency focused on business transformation. [Valtech Innovation Lab](#) is a peripheral event to National Retail Foundation 2018, also in New York City, inviting attendees for a weekend of learning on a more intimate scale. This invitation-only event offers a chance to meet the leaders transforming the technology industry and paving the way for the future of retail innovation.

"I find this particular event extremely interesting because of the one-on-one opportunity each startup will receive with attendees," says Co-Founder and CEO of Bouquet, Adrien Schmidt. "Valtech offers a space for like minded innovators to showcase the next generation technologies with people looking exactly for what companies such as ours have to offer. I believe Aristotle will really be able to shine here."

Bouquet powers the world's first AI chatbot, named Aristotle, which turns data analytics into real conversations. At Valtech Innovation Lab, participants will receive a demonstration of exactly how Aristotle improves the way enterprises receive and understand information while dramatically reducing the time it takes to search and analyze, accelerating the pace of business. Adrien and his team will be available for a more intimate discussion of the implementation of artificial intelligence and machine learning in the realm of big data and technological adaptation.

You can also find Adrien at the [World Government Summit](#) in Dubai February 11-13, 2018. This summit is comprised of the world's most influential members of government, thought-leaders and innovators, spearheading the conversation of technology and human development on a global scale.
