

Adhesives & Sealants Market 2018 Global Industry Analysis, Opportunities and Forecast To 2023

Adhesives & Sealants Market 2018 - Current and Future Plans

PUNE, INDIA, January 16, 2018 /EINPresswire.com/ -- Global [Adhesives & Sealants](#) Market for Handheld Devices - by Adhesives (Hot Melt, Pressure Sensitive, Waterborne, Solvent Based, and Others), by Sealants (Silicone, Polyurethane, Acrylic Latex, Epoxy, Butyl and Others), by Application (Mobile Phones & Tablets, Laptops, Hard Disc Drives, Medical Devices and Others), and by Region - Forecast till 2023

Synopsis of Adhesives & Sealants Market for Handheld Devices

Adhesives & sealants are materials used for holding two surfaces together. Adhesives wet the surface and develop strength after it has been applied. Adhesives are generally a mixture that occurs in a liquid or semi liquid-state. A sealant can be defined as a viscous material used for filling the gaps that are difficult to close using adhesives or other materials. Adhesives and sealants have wide application across an array of industries one of being the electronic industry. Both adhesives and sealants are core to the manufacturing and assembling of portable electronic devices viz., mobile phones & tablets, laptops, and storage devices among other devices. Adhesives are widely used as a bonding agent while manufacturing and assembling of electronic components such as touch screens, camera lenses, drives, connectors and PCB among others into the latter mentioned handheld devices, whereas, sealants restrict the entry of foreign particles by filling the small gaps where the use of adhesive is limited. Different types of adhesives are used for different purposes during the manufacturing of an electronic device. For instance, commonly hot melt adhesives are preferred owing to its extensive properties such as improved dispensability and reworkability among others. Likewise, commonly used sealants include silicone and urethanes.

Protuberant market impetus factors and trends fostering growth of global adhesives & sealants market for handheld devices market include increasing penetration of smartphones and tablets, rising popularity of gaming laptops & detachable laptops and the growth of consumer electronics market among other factors. Besides, patterns, for example, rising electronic gadget get together center point in Southeast Asian countries and critical FDI in the ASEAN district from

created countries among different patterns is relied upon to offer lucrative open doors for the market. As indicated by MRFR investigation, in total the worldwide adhesives and sealants for handheld devices was valued at USD 4,882.6 million in 2016 and is expected to reach USD 7,946.8 million by the end of 2023, growing at a healthy CAGR of 7.21%.

Regional Analysis

Global adhesives & sealants market for handheld devices is divided into five main geographies — north America, Europe, Asia Pacific, Latin America, and Middle East & Africa. Among the aforementioned regions, Asia Pacific is the biggest market for adhesives and sealants for handheld devices and records for over half of the volume share in the worldwide market, with a solid impression of worldwide adhesive and sealant makers alongside the rising hardware showcase in the locale are a portion of the market impulse factors cultivating development of adhesive and sealants market in the region. Asia Pacific market for adhesives is expected to reach USD 3,630.7 million by the end of 2023 expanding at a CAGR of 9.0%. Southeast Asian countries offer major growth prospects for adhesives and sealants for handheld devices with an emerging electronic device assembly hub along with the huge production base for various electronic devices such as mobile phones, laptops, and storage devices.

Segmentation

The global adhesives & sealants market for handheld devices is segmented on the basis of adhesive types, sealant types, application and region. On the basis of adhesive type, global adhesives & sealants market for handheld devices is segmented into hot melt adhesives, pressure sensitive adhesives, waterborne adhesives, and solvent borne adhesives among others. Based on sealant types the market is segmented into— silicone sealants, polyurethane sealants, acrylic latex sealants, epoxy sealants, and butyl sealants among others. Based on application, the global adhesives & sealants market for handheld devices is segmented into— mobiles & tablets, laptops, hard disc drives, and medical devices among others.

Key Players

Key players of the global adhesives & sealants market for handheld devices are Henkel AG & Co. KGaA, 3M, Evonik Industries AG, Dow Corning Corporation, H.B. Fuller, Novachem Corporation and Targent Industries among others.

Key Findings

Global Adhesives & Sealants Market for Handheld Devices is projected to reach USD 7,946.8 million by the end of 2023, expanding at a CAGR of 7.21%. Asia Pacific to account for largest share due to growing application industries in this region. Adhesives & sealants market for handheld devices is a semi-fragmented market, however, tier1 manufacturers dominate the market. Asia Pacific is the largest producer and consumer of adhesives and sealants for handheld devices, which accounted for more than half of the overall adhesives & sealants

market for handheld devices. New product development and expansion of major players to the emerging markets are some of the noted trends in the global market.

Intended Audience

- Adhesive & Sealants manufacturers
- Traders and distributors of Adhesive & Sealants
- Adhesive & Sealants Associations
- Potential investors
- Raw material suppliers

DC –Description

- Adhesive & Sealants
- Handheld Devices
- Hot Melt Adhesives
- Silicone Sealant

The report about Global Adhesives & Sealants Market for Handheld Devices by Market Research Future comprises of extensive primary research along with detail analysis of qualitative as well as quantitative aspects by various industry experts and key opinion leaders to gain a deeper insight of the market and industry performance. The report gives a clear picture of the current market scenario which includes past and estimated future market size in terms of value and volume, technological advancement, macro economical and governing factors in the market. The report further provides detail information about strategies used by top key players in the industry. It also gives a broad study about different market segments and regions.
