IT Governance helps more than 7,000 people across the globe earn accredited ISO 27001 qualifications

ELY, UNITED KINGDOM, January 17, 2018 /EINPresswire.com/ -- IT Governance, a leading provider of information security accredited training courses and ISO 27001 expertise, has delivered qualification-based training to more than 7,000 people worldwide on implementing and auditing ISO 27001, the industry-best practice standard for an information security management system (ISMS).

Alan Calder, the founder and executive chairman of IT Governance, said: "IT Governance is proud to have helped more than 7,000 clients achieve an internationally recognised qualification, enabling them to implement internationally auditable ISMSs. The benefits of achieving ISO 27001 certification are widely reputable and have proven instrumental in ISMS implementation and auditing in a variety of industries. These benefits include avoiding penalties and financial losses due to data breaches, meeting increasing client demands for greater data security, and meeting local and global security laws such as the Directive on Security of Network and Information Systems (NIS Directive) and the General Data Protection Regulation (GDPR)."

The ISO 27001 training courses are tailored to the specific needs of professionals everywhere, and are available in classroom and Live Online formats. Positive testimonials from attendees prove that IT Governance continues to be the provider of choice for helping individuals and enterprises make cyberspace safer while tackling the challenges of effective information security.

Daniel Gwalter, Head of IT at Partnership UK, said of IT Governance's ISO 27001 Lead Implementer course: "On the whole I found the course to be well structured, aimed, and adapted for the target audience. I felt the presenters worked well as a team and my expectations were exceeded. Thank you."

Information security professionals looking to implement a stronger and more effective ISO 27001-compliant data security programme will benefit greatly from the ISO 27001 Certified ISMS Lead Implementer course. They will learn how to secure senior management commitment and build the business case, determine the scope of an ISMS, develop and manage an ISO 27001 project, and allocate roles and responsibilities.

To learn more about ISO 27001 or discover the best solutions to your cyber security challenges, IT Governance offers a variety of certified training courses, security testing services, books, toolkits, software and consultancy services.
