PUNE, MAHARASHTRA, INDIA, January 16, 2018 /EINPresswire.com/ -- [Medical Animation](#) Industry

Description

Global Medical Animation Market is accounted for \$130.47 million in 2016 and is expected to reach \$421.11 million by 2023 growing at a CAGR of 18.2% during the forecast period. Growing penetration of Smartphones, rising usage of medical animation by life sciences & medical device and increasing ageing population are some of the factors fueling the market growth. However, high cost of medical animation services is hampering the market. Emerging economies are offering new growth opportunities for the players in the medical animation market.

Advent of biological illustration and 3D computer graphics in healthcare marketing is contributing towards the dominant share of life science segment. Increasing research activities for the development of new product and related awareness concerning to various injuries, diseases and defects, the adoption of animated studies is anticipated to increase in coming years. The Asia-Pacific region is expected to grow at the highest CAGR during the forecast period. The high growth of this region can be attributed to the growing pharmaceutical industry, growing number of medical institutes in India, lucrative medical devices industry in China, entry of local players and low cost of medical animation in India.
