

Pioneering Perfect Placement

With Rhino-Rack Backbone engineering, the Pioneer Platform reinforces and allows you to carry everything you need for your next outdoor adventure.

BOULDER, CO, USA, January 16, 2018 /EINPresswire.com/ -- The Jeep Wrangler has long been one of the benchmarks for a robust and tough 4WD vehicle. And among the variety of makes and models on the market, it still remains one of the best looking 4WDs on the market. It makes little sense to tinker with the iconic look with a set of ill-fitting roof or carry racks.

That's why Rhino-Rack has designed the Rhino-Rack Backbone and Pioneer Platform system as the quintessential accessory for Jeep Wranglers – low profile, strong and supremely versatile. Maintaining Jeep's unique aesthetic appeal, the Rhino-Rack Backbone and Pioneer Platform combination have a static load rating of 800lb and dynamic load rating 264lb of extra weight by distributing it evenly over the body of the vehicle. With Rhino-Rack Backbone engineering, the Pioneer Platform essentially reinforces the already strong design and allows you to carry everything you need for your next outdoor adventure.

The Pioneer is made from a combination of reinforced nylon and aluminium, making it strong, durable and lightweight. Like all Rhino-Rack products, the Pioneer Platform and Rhino-Rack Backbone has been tested repeatedly in some of Australia's most rugged and harsh conditions to ensure it's adventure-ready. The non-corrosive materials ensure it won't rust in salty conditions or fade over time, meaning the Pioneer will look just as good as your Jeep, for the life of the rack.

With its low profile and simplistic design, the Pioneer makes loading and unloading equipment easier than ever. The wide flat surface means all you have to do is slide the equipment on top and tie it down utilising the C - channels, then you're ready to head off. It's also conveniently designed to carry existing Rhino-Rack accessories including luggage bags, jerry can holders, spare wheel holders shovels, is perfect for Roof top tents and loads more.

For the essential carry rack that won't damage your Jeep, or alter its already iconic design, choose the Rhino-Rack Backbone & Pioneer Platform combination.
