

M. Weston Non-Surgical Hair Restoration Opens in Ohio

AKRON, OHIO, USA, January 18, 2018 /EINPresswire.com/ -- M. Weston Non-Surgical Hair Restoration, an Artistry Concepts' subsidiary, the first and longest running [scalp micropigmentation](#) provider in the United States, announces the opening of their fourth location in Akron, Ohio.

Since the founding of its parent company, Artistry Concepts in 2009, non-surgical hair loss treatments have been provided to more than 4,000 clients and currently is located in Florida. The Ohio Weston Center marks the third US center (one location in Mexico) to be able to provide proven non-surgical hair restoration services to a wider audience of men and women.

“As part of The Weston Center’s [national expansion](#), our additional location in Ohio will serve the needs of more individuals suffering from hair loss,” says Weston Center Corporate Owner Mark Weston. “As the only worldwide scalp micropigmentation company to offer a proven and patented system, [The Weston System](#) has helped thousands of individuals overcome their hair loss issues via the latest advancement in technology and innovations.”

David and Sonja Banks are the Licensees of the Ohio Weston Center

Ohio Weston Center licensees, David J. Banks, 46, a licensed master barber whom graduated from Allstate Barber College in 1995 and his wife, Sonja Banks, was the former director of Paul Mitchell the School in Cleveland, Ohio. After a close family friend received The Weston SystemSM, they saw how elated their friend was and how it changed his confidence. Seeing many of their long-term clients go through the pain of hair loss over the past twenty years, David and Sonja were enthusiastic about the possibility of helping their clients with hair loss.

David and Sonja contacted Mark Weston and inquired about training in The Weston SystemSM and operating a Weston Center. Their choice of a Weston Center was an effortless decision after contacting many of the well-known multi-session companies. Personally seeing the outcome of The Weston SystemSM on their friend, they saw the value in Weston's one-session and permanent method. Not wanting to subject their clients to further stress by offering long-term multi-sessions and touchups, The Weston SystemSM was the perfect and only choice for them.

The Ohio Weston Center located in Suite 347, 3094 West Market Street, Fairlawn, Ohio, is now open

for business. For more information on the Ohio Weston Center, please visit: <https://www.markwestonhair.com/locations/ohio-scalp-micropigmentation>

Offering a one appointment only and permanent, non-surgical solution to hair loss for both men and women, The Weston SystemSM is an exclusive and patented technologically-advanced hybrid medical scalp micropigmentation method that mimics lost follicular hair units on the scalp. This System is successful in replicating lost follicles for men, women and also for camouflaging hair transplant scars and added density.

Locations in Southern California and Chicago, Illinois will open by the Spring of 2018. Locations are presently operating in Florida, Georgia, Mexico and now Ohio.
