

# Store Share Access (SSA) Showcases One of a Kind Client Portal in Roofing CRM

*Chuck Magee with SSA, Store Share Access showcases industry unique roofing client portal for all SSA CRM members.*

BATON ROUGE , LOUISIANA, UNITED STATES , January 18, 2018

/EINPresswire.com/ -- SSA showcases roofing industry [client portal](#) for all their roofing companies' clients. SSA continues to be a leader in the roofing industry by providing [CRM technology](#) to meet the unique needs of its roofing companies and their clients.

SSA

Making technology easier to use has been SSA's goal from the start. SSA brought roofing companies a method to set one price for one company with a new mindset and a new way to pay. Even for companies that aren't familiar with CRM technology, this new client portal makes learning successful through intuitive interfaces and an easy-to-learn system.

“

SSA client portal is a great way for roofing companies to stay in touch and communicate with their clients”

*Chuck Magee*

After launching this innovative software in December 2014, Chuck Magee said, "SSA client portal is a great way for roofing companies to stay in touch and communicate with their clients."

Roofing companies can access key details on every current roofing project with this cutting-edge technology. Useful information includes: the date of the roof installation or roof repair work, pictures of the home for identification, pre-work to post-work images to track progress, sales and crew information and client contact information. By accessing the portal, clients can easily contact their roofing professionals directly and get questions answered quickly.

The SSA client portal also houses important documents for every stage of the roofing process. From the roof financing application to completion certificates, one of the great features of the portal is the ability to complete and sign all documents online. The documents are then stored in the SSA [Store Share Access](#) portal for the companies and the clients to access as needed.

Whether it's planning stage documents to choose roofing materials and colors or documents for insurance verification after damage from wind and hail storms or accidents, the client portal makes it easy to upload and download the necessary documents at any point before, during and after the roofing process. Both the roofing companies and clients can rest assured that this information is stored safely so it can be retrieved at any time.

## About Store Share Access (SSA)

SSA was designed and is sold and supported by roofers that have been in the roofing construction industry for many years. SSA is simple to use with no complex software to learn. SSA is accessible and works on any device from anywhere. SSA is affordable with one low monthly price no matter how many users a company adds. Store Share Access, the roofing industry's best friend in a CRM.
