[POS Cash Drawer Market 2018](#)

A point of sale (POS) cash drawer is a removable drawer with several compartments for sorting denominations and coins. It is located underneath registers and stores cash from transactions at brick-and-mortar stores. A POS cash drawer interface is linked to a POS system, which sends an electrical signal to release the latch. Traditionally, this signal is sent by receipt printer, or manually, among other types. The report segments the market based on interface type and end user. The interface types are categorized into printer-driven, Ethernet-driven, serial and USB-driven and manually-driven cash drawers.

The analysts forecast the global POS cash drawer market to grow at a CAGR of 6.57% during the period 2017-2021.
