

Global Automotive Fog Lights Market is Expected to Grow at a CAGR of 6.9% at the End of 2023

PUNE, MAHARASHTRA, INDIA,
January 19, 2018 /EINPresswire.com/ --

WiseGuyReports published new report, titled "Global Automotive Fog Lights Market"

Market Scenario

Fog lights are one of the most important parts in vehicle as they are used for clear visibility in darkness and helps in viewing the better road condition in darkness. Fog lights are placed bottom of head lights and mounted on bumpers. In automotive market, fog lights are completely a separate units from standard headlights.

The global automotive fog lights market has seen a potential growth over the last few years and it has been anticipated that the market will retain the same growth during the forecast period. The global fog lights market looks very promising due to the major driving factors such as rapidly increasing sales of new vehicles, rising concern over road safety, major development on fog light by key players in emerging economies, shifting preference for aftermarket services and others. Despite these factors, the fog lights market could face some growth challenges during forecast period such as strict government regulation over vehicle and road safety along with no objection certification and increasing pricing pressure. Moreover, the major opportunities that have knocked the doors for automotive fog lights manufacturers is that increasing preferences for fog lights among huge vehicles users for safety as well as aesthetic appeal coupled with rising disposable income in emerging economies. As per MRFR analysis, the global automotive fog lights market is expected to grow at a CAGR of 6.9% during the forecast period, where the market value is projected to reach USD 3,928.5 million by 2023 from USD 2,475.3 million in 2016.
