The group is especially focused on assisting an electrician, plumber, construction worker or a Navy Veteran with recently diagnosed mesothelioma in Arizona because they have a great deal knowledge about how these types of people were probably exposed to asbestos. One thing that makes Arizona

unique is most people who will be diagnosed with mesothelioma there were probably exposed to asbestos in another state. Either the person was exposed to asbestos in the US Navy or they were a manufacturing, industrial or skilled trades worker in the Midwest or the Plains States and they moved to Arizona to escape brutal winters.
