

# Botmetric Announces API Access for its AI-powered Cloud Management Platform

*Flexibility to Build Upon Top-Rated Platform on AWS Marketplace*

SANTA CLARA, CALIFORNIA, UNITED STATES, January 22, 2018 /EINPresswire.com/ -- [Botmetric](#), a leading AI-powered cloud management platform that helps digital businesses simplify and optimize their cloud services, today announced it is making its APIs public so that customers and partners can build more flexible solutions on top of the existing out-of-the box features provided by the Botmetric cloud management platform.

With access to the API, Botmetric customers will be able to take advantage of the Botmetric Platform to integrate its features and data into their IT systems. Users will be able to leverage Botmetric API's to access, manipulate and customize the data feeds for their specific cloud management requirements. This means users can now connect Botmetric to virtually any third-party business system or application.

"We have always been an API-centric platform with microservices architecture. We are now opening up APIs to be consumed by our customers to access their data on Botmetric. This will enable customers to build on top of the existing features provided by Botmetric," said Botmetric CEO Vijay Rayapati.

Vijay - CEO of Botmetric

Botmetric customers can now fetch fine-grained cost details and run their custom business logic on top to gather specific insights. They can also add to their custom dashboards. Many of Botmetric's enterprise customers have internal dashboards with information from multiple tools and platforms at one place. Now, they can add their cloud cost details as well to such dashboards using Botmetric's platform APIs.

“

The only way to help companies reduce their cloud costs, improve cloud security compliance, and reduce alerts fatigue is by bringing intelligent machine operations for cloud management”

*Vijay Rayapati*

[Cloud cost management](#) is the most important priority for 77% of mid-size and enterprise cloud users, according to Botmetric's independent Botmetric Public Cloud Usage Report 2017, which offers insights encapsulating the public cloud adoption and usage trends in SMB, Midmarket and Enterprise customer segments across the world. With increasing cloud adoption businesses are trying to make

cloud cost predictable. The API capability is also a boon to Botmetric's managed service providers

(MSPs) who can now use these APIs to aggregate data across their various customers on Botmetric.

Botmetric uses machine intelligence and AI technologies to offer full visibility and governance control over AWS cloud and Microsoft Azure with one integrated platform for cloud cost, cloud security, and cloud operations. This module is a single pane to understand and maximize cloud savings. It provides complete budgeting and forecasting guidance for cloud cost management. The company is at the forefront of AIOps (Algorithmic IT Operations, a term coined by Gartner), which is the next step in deploying AI solutions.

“The only way to help companies reduce their cloud costs, improve cloud security compliance, and reduce alerts fatigue is by bringing intelligent machine operations for cloud management” Rayapati said.
