

Global Orthopedic Software Market is Expected to Reach \$385.7 million by 2023

Market Research Report on Global Orthopedic Software Market

RAIPUR, INDIA, January 22, 2018
/EINPresswire.com/ --

Report Sellers has added a new market research report "[Orthopedic Software - Global Market Outlook \(2017-23\)](#)" to its offerings.

According to Report, the [Global Orthopedic Software Market](#) is accounted for \$250.9 million in 2016 and expected to grow at a CAGR of 6.3% to reach \$385.7 million by 2023. Factors such as rise in style oriented diseases, adoption of minimally invasive surgeries, huge population of elderly patients, enhancement in R&D and technological advancement and enhancing incidence and prevalence rate of arthritis and osteoporosis are driving the market growth. However, emerging economies which have poor healthcare insurance policies and high cost of surgeries are likely to hinder the market growth. Further, emergence of 3d printing technology, increasing awareness about orthopedic diseases and emerging economies would provide ample opportunity for the market growth.

North America is witnessed to be the largest orthopedic software market due to extensive technological advancements in the region. Countries such as the U.S. and Canada have been endowing eHealth and mHealth as well as advanced visualization systems in their healthcare system. Europe is the second largest market owing to enhanced digitization and rise in geriatric population prone to knee ailments. Asia Pacific is expected to be an opportunistic market owing to China, Japan and India as the most developing countries in the region. In addition, the Asia Pacific region is prevailing with higher incidence of bone disorders and lifestyle related knee, spine and cervical ailments. However, the lack of expertise by orthopedic physicians as well as medical staff regarding software usage and cost of installing the software for hospitals and clinics is likely to impede the market growth.

Some of the key players in global Orthopedic Software market are Quality Systems, Inc. (Nextgen Healthcare Information Systems, LLC.), Merge Healthcare Inc., Medstrat, Inc., Mckesson Corporation, Materialise NV, Healthfusion Inc., Greenway Health, GE Healthcare, Curemd and Brainlab AG.

What does the Report Offers

- Market share assessments for the regional and country level segments
- Market share analysis of the top industry players
- Strategic recommendations for the new entrants
- Market forecasts for a minimum of 7 years of all the mentioned segments, sub segments and the regional markets
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends
- Company profiling with detailed strategies, financials, and recent developments

Report Scope

Global Orthopedic Software Market has been segmented by delivery modes covered, products covered, applications covered, end users covered and regions covered

Delivery Modes Covered:

Web Based Solutions

On-Premise Solutions

Cloud-Based Solutions

Products Covered:

Orthopedic Revenue Cycle Management

Orthopedic Practice Management

Orthopedic Picture Archiving and Communication Systems (PACS)

Orthopedic Electronic Health Record (EHR)

Digital Templating/Pre-Operative Planning Software

Applications Covered:

Fracture & Limb Deformity Management

Joint Replacement

Orthopedic Surgery

Pediatric Assessment

End Users Covered:

Independent Orthopedic Clinics

Hospitals

Surgery Centers

Other End Users

Research Centers

Nursing Homes

Regions Covered:

North America

US

Canada

Mexico

Europe

Germany

France

Italy

UK

Spain

Rest of Europe
Asia Pacific
Japan
China
India
Australia
New Zealand
South Korea
Rest of Asia Pacific
South America
Argentina
Brazil
Chile
Rest of South America
Middle East & Africa
Saudi Arabia
UAE
Qatar
South Africa
Rest of Middle East & Africa
