PUNE, INDIA, January 23, 2018  
/EINPresswire.com/ --

North America [Cyber Insurance Market](#)

## Description

WiseGuyReports.Com adds” North America Cyber Insurance Market by Manufacturers, Countries, Type and Application, Forecast to 2022 “Research To Its Database.

Cyber-insurance is an insurance product used to protect businesses and individual users from Internet-based risks, and more generally from risks relating to information technology infrastructure and activities. Risks of this nature are typically excluded from traditional commercial general liability policies or at least are not specifically defined in traditional insurance products. Coverage provided by cyber-insurance policies may include first-party coverage against losses such as data destruction, extortion, theft, hacking, and denial of service attacks; liability coverage indemnifying companies for losses to others caused, for example, by errors and omissions, failure to safeguard data, or defamation; and other benefits including regular security-audit, post-incident public relations and investigative expenses, and criminal reward funds.

## Scope of the Report:
