PUNE, MAHARASHTRA, INDIA, January 25, 2018 /EINPresswire.com/ --

WiseGuyReports published new report, titled "Synthetic Biology: Global Markets"

Report Scope:

The study scope includes core synthetic-biology products (synthetic genes, biobrick parts, delivery plasmids, chassis organisms, synthetic cells, production systems), enabling technologies (DNA sequencing, DNA synthesis and assembly, genome editing, bioinformatics and specialty media) and enabled technologies (biofuels, chemicals, pharmaceuticals, agriculture) that are already commercialized or are forecast to be commercialized within the next five years. We analyze key synthetic-biology technologies and products to determine present and future market status, and forecasted growth from 2016 through 2021. We also discuss strategic alliances, industry structures, competitive dynamics, patents and market driving forces.

BCC Research examines the synthetic-biology industry by market segment, including the following segments: DNA sequencing; DNA synthesis; genome editing; synthetic-biology foundries; industrial biotechnology; pharmaceuticals; and agriculture. The role of key strategic alliances and acquisitions from 2014 through 2016 is discussed. Emerging markets including synthetic genes, synthetic-biology-enabled drugs and vaccines, genome-edited crops, chassis organisms, as well as metabolically engineered factories for producing synthetic fuels and specialty chemicals are analyzed, and more than 135 companies in these fields are highlighted.
