MyQuickCloud Is The 10 Most Innovative Enterprise Mobility Solution Provider In 2017

LONDON, LONDON, UNITED KINGDOM, February 5, 2018 /EINPresswire.com/ -- MyQuickCloud.com is recognized by Insights Success as among the 10 Most Innovative Enterprise Mobility Solution Provider In 2017. MyQuickCloud has set itself apart by delivering an enterprise-class mobility technology for small

businesses. MyQuickCloud creates a secure private cloud within an organization's existing system and makes remote access to applications and data seamless so they don't have to migrate to hosted cloud services.

"By taking into consideration employee productivity, operational efficiency, reduction of mobility complexities, the confrontational style of doing business and a host of other factors, Insights Success has shortlisted MyQuickCloud amongst the 10 Most Innovative Enterprise Mobility Solution Providers. In the opinion of our illustrious judges, MyQuickCloud is an emerging innovative mobility solution enterprise, which is providing secure and efficient remote desktop access software." mentions Pooja M. Bansal, Editor-in-Chief of Insights Success.

MyQuickCloud's strength comes from its unique approach to the market and from a highly skilled team of individuals who love what they are doing. Giving business mobility, keeping to a high level of quality and maintaining the best practices allows MyQuickCloud to deliver high end mobility solutions for business. "Business users and IT managers need affordable and easy to manage methods for making applications accessible and securing data for mobile users. Rather than focusing on protecting copies of data and software on different devices, there should be a solution that keeps all applications and data contained on a central system where users can seamlessly access those software and data resources from anywhere without the need to install apps or copy data to the device" says Talal Choucair, CEO of MyQuickCloud.

MyQuickCloud was able to set themselves on the market by providing enterprise-class mobility solutions with its distinctive features; offered in a market that comes with immense cost and complexity. "MyQuickCloud accomplishes this and more, simply and affordably" adds Talal Choucair..

"We are honored to be recognized by Insights Success as among the 10 Most Innovative Enterprise Mobility Solution Provider in 2017," said Talal Choucair, CEO of MyQuickCloud. This recognition further validates MyQuickCloud's positioning on the market and pushes the company to offer better innovative mobility technology.

About MyQuickCloud

MyQuickCloud is secure remote access that makes desktop applications available anytime, anywhere. Whether the host computer is on-premises or cloud, MyQuickCloud instantly turns the computer into a cloud host that delivers remote desktops, virtual applications and workspaces accessible by PC, Mac or mobile device. MyQuickCloud's unique approach creates encrypted connections on-demand, eliminating the need for specialized VPNs or firewall configuration. MyQuickCloud single and multiple host models support distributed operations, enable seamless migrations and power comprehensive disaster recovery. MyQuickCloud is the foundation for delivering secure and streamlined business IT. Visit MyQuickCloud.com
