

# Bouquet at Decentralized AI Summit

*AI-powered chatbot exhibits at tech conference in San Francisco*

SAN FRANCISCO , CA, USA, January 29, 2018 /EINPresswire.com/ -- [Bouquet](#) will be exhibiting at this year's [Decentralized AI Summit](#), in San Francisco, CA on February 1, 2018, for a day of innovation and conversation about the foundation of decentralized intelligence perpetrating new fields of technology. This one-day event will also bring together like-minded individuals to talk shop about applied AI in areas such as robotics, healthcare, AR/VR and more.

Bouquet will have an exhibitor booth at the conference for attendees to visit and learn more about Aristotle, the world's first AI-powered chatbot that turns data analytics into meaningful conversation. Their team will be equipped with iPhone's, allowing interactive and first-hand demonstrations of Aristotle's functionality and usability via Facebook messenger.

“

Aristotle becomes your personal AI analyst, 24/7, from the convenience of your computer screen or at the palms of your hand from your mobile device.”

*Adrien Schmidt, Co-Founder and CEO*

“What’s great about Aristotle is that he is always by your side; he is always on and ready to deliver data across multiple interfaces and formats when needed,” says Co-Founder and CEO, Adrien Schmidt. “Aristotle becomes your personal AI analyst, 24/7, from the convenience of your computer screen or at the palms of your hand from your mobile device.” Adrien will also be participating in a panel discussion called “AI Economies”, on the main stage, with fellow experts in their fields, Mark Nadal, Sam Udotong and McCall McIntyre.

Bouquet believes less is more. They are providing a solution for meaningless hours of data searching, learning difficult programs, and eye-fatigue looking at numerous dashboards. Aristotle streamlines information to one productive platform, creating a straightforward conversation, as easy as a regular chat with a friend, to find the answers you’re looking for.

Following this event, find Adrien speaking at [Conversational Interaction](#) in San Jose, CA, on February 5-6, 2018. This conference targets the growing evolution of the way humans communicate with one another and the influence technological interfaces have created in challenging, changing and improving the way in which we do so. Representatives from Google, Microsoft, Amazon and Oracle, just to name a few, comprise the impressive speaker and panelist roster headlining this conference.

Registration is still open; RSVP your spot via their website.
