[Ground Protection Mats Market 2018](#)

Ground protection mats are heavy-duty mats that are used for protecting the surface or turf from damage due to foot traffic, and machinery and vehicular. These ground protection mats are highly durable and are made of high-density materials that are capable of withstanding heavy loads. The mats are not only used for the protection of ground but can also be used as temporary walkways. Ground protection mats are made of materials such as polyethylene plastics, polypropylene plastics, and PVC (polyvinyl chloride) plastics. In addition, eco-friendly and recyclable products such as wood and rubber are increasingly used to manufacture ground protection mats.

The analysts forecast the global ground protection mats market to grow at a CAGR of 3.55% during the period 2017-2021.
