The Hat Property is fully permitted and is equipped with winter-ready camp and facilities. Doubleview and its exploration personnel are well experienced in cold weather operations and the 2018 program should have a quick start-up. Details of the program will be announced soon.

Doubleview discovered the Lisle zone in 2013 and subsequently drilled over 10,000 metres in thirty drill holes. Lengthy mineralized drill intercepts include the following:

DH H-022: 418.28 m @ 0.51% CuEq\* - from 45.5m to 463.8m

Including:

DH H-022: 110.16 m @ 1.01% CuEq - from 304.9m to 415.0m

And

DH H-023: 332.37 m @ 0.56% CuEq - from 67.9m to 400.2m

Including:

DH H-023: 80.07 m @ 1.00% Cu Eq - from 270.6m to 350.7m

\* CuEq figures employ the following metal prices: Gold: \$1300/oz, Copper: \$3.0/lb, Silver: \$17/oz, and Cobalt: \$35/lb. CuEq. calculations are presented in US dollars and will vary with market and currency fluctuations.

Prospecting and surface sampling in the Hoey Gold area of the Hat property have shown assay values as high as 7% copper and 8.1 grams per tonne gold. The Company believes that the Hoey is potentially an important addition to the Lisle deposit.
