

# Global IoT Fleet Management Market is Expected to Reach \$13.17 billion by 2023

*Global IoT Fleet Management Market Research Report*

RAIPUR, INDIA, January 31, 2018  
/EINPresswire.com/ --

Report Sellers has added a new market research report "[IoT Fleet Management - Global Market Outlook \(2017-23\)](#)" to its offerings.

According to Report, the [Global IoT Fleet Management Market](#) is accounted for

\$3.17 billion in 2016 and is expected to reach \$13.17 billion by 2023 growing at a CAGR of 22.5% during the forecast period. Requirement for optimum operational efficiencies and increasing trends towards smartphone integration with vehicles are factors contributing for the market growth. However, absence of IoT infrastructure in emerging countries is restricting the market. Moreover, Truck Platooning, Cloud and Fog Computing Analytics provide huge growth opportunities for the market.

Fleet Management is a capacity which permits organizations which depend on transportation in business to expel or limit the dangers related with vehicle investment, improving efficiency and productivity and diminishing their general transportation and staff costs, giving 100% consistence government enactment and some more. The hybrid model has a significant growth in the market due to benefits such as higher flexibility of data management and adequate data implementation privilege at lesser prices. It allows data backup and recovery on cloud infrastructure. The fluctuating trend of subscription-based solutions is also developing at a modest pace. These require endless cloud server with easy accessibility. The joint scalability and flexibility of virtual cloud server will accelerate the growth of the hybrid model market.

Device management is utilized as a part of IoT fleet management market because of extended usage of customized devices, for example, cell phones and tablets. It encourage device confirmation, remote access, observing, and investigating and offers security highlights against hacking and malware assaults. The OAuth 2.0 and OpenID Connect 1.0 are the approval models that improve the device confirmation that works with IoT server.

By geography, Americas region has acquired the largest market share in the IoT fleet management market owing to expanding offers of fleet vehicles, high appropriation rate of advanced technological products and administrative advancements by the government. Likewise, a portion of the Original Equipment Manufacturers (OEM) in this region, for example, Volvo Trucks and Daimler Trucks North America, LLC began offering telematics arrangements either freely or in association with fleet arrangement suppliers.

Global IoT Fleet Management Market Research Report

Some of the key players in IoT Fleet Management market include Cisco Systems, Inc., Trimble, Inc., International Business Machines Corporation (IBM), Intel Corporation, Omnitrac, AT&T, Inc., Verizon Communications, Inc., Tomtom International BV, Telefonica, S.A. and Sierra Wireless.

What does the Report Offers

- Market share assessments for the regional and country level segments
- Market share analysis of the top industry players
- Strategic recommendations for the new entrants
- Market forecasts for a minimum of 7 years of all the mentioned segments, sub segments and the regional markets
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends
- Company profiling with detailed strategies, financials, and recent developments

Report Scope

Global IoT Fleet Management Market has been segmented by application covered, platform covered, cloud deployment model covered, services covered, fleet type covered and regions covered

Application Covered:

Driver Information System

Fuel Management

Routing Management

Vehicle Maintenance

Drive Time Analysis

Fleet Analytics

Remote Diagnostics

Tracking and monitoring

Other Applications

Platform Covered:

Network management

Device management

Application Enablement Platform (AEP)

Cloud Deployment Model Covered:

Public

Hybrid

Private

Services Covered:

Managed

Professional

Fleet Type Covered:

Public buses  
Commercial Vehicles (CV)  
Passenger Cars (PC)

Regions Covered:

North America  
US  
Canada  
Mexico  
Europe  
Germany  
France  
Italy  
UK  
Spain  
Rest of Europe  
Asia Pacific  
Japan  
China  
India  
Australia  
New Zealand  
South Korea  
Rest of Asia Pacific  
South America  
Argentina  
Brazil  
Chile  
Rest of South America  
Middle East & Africa  
Saudi Arabia  
UAE  
Qatar  
South Africa  
Rest of Middle East & Africa
