

# Simply NUC® announces first quad-core 8th Gen i7 commercial NUCs as latest edition Intel® Dawson Canyon NUC models

*The latest additions of commercial NUCs include two new standard NUC models as well as fan-less and board-only models available now for pre-order.*

AUSTIN, TEXAS, UNITED STATES, January 31, 2018 /EINPresswire.com/ -- AUSTIN, Texas and Belfast, UK— [Simply NUC, Inc.](#), an Intel® Platinum Partner and a leading Intel NUC integration company based in Round Rock, Texas, today announced the latest commercial Intel NUC lineup powered by quad-core 8th Gen Intel® Core™ i7 processors. The new models will also come with an optional fan-less chassis which adds additional IO capabilities and opens new use applications for the NUC platform.

“We have anxiously awaited this new i7 Commercial NUCs” said Aaron Rowsell, CEO of Simply NUC, “These new commercial NUCS will provide a level of performance never before seen in the standard 4 x 4 inch NUC package. Since these new units are designed to run headless and has a server class ethernet controller, they will also make amazingly powerful small servers.”

Simply NUC is taking pre-orders now on both the US and EU based websites and will also offer demo Dawson Canyon NUC systems for businesses interested in considering the new Intel NUCs as their standard desktop, conference room PC, industrial control and/or digital signage players. Demo requests can be placed at [www.buildanuc.com](http://www.buildanuc.com) as soon as production units are available.
