

Adrien Schmidt: Keynote at Conversational Interaction

CEO of Bouquet speaks about AI chatbots at tech conference

SAN JOSE, CALIFORNIA , USA, February 1, 2018 /EINPresswire.com/ -- Adrien Schmidt, innovator, engineer, and CEO of [Bouquet](#), the worlds first AI-powered chatbot that turns data analytics into meaningful conversation, will be speaking at this year's [Conversational Interaction](#) Conference in San Jose, California. This two-day event on February 5-6, 2018, revolves around the intricacies of how technology has transformed the way in which humans now communicate and interact with one another socially and professionally.

Adrien will be presenting on Tuesday, February 6, 2018, at 8:00 am to 8:45 am on the topic “Analytics Powered by Conversation”. His presentation will focus on the implementation of his company’s AI-powered chat, Aristotle, and the impressive ways enterprises can now utilize this tool to have a conversation with their data. Aristotle acts as a personal AI analyst, on the go, 24/7, offering data across various interfaces and multiple formats such as email, graphs/charts, and voice command.

“Aristotle is specifically designed for busy people,” says Adrien, Co-Founder, and CEO of Bouquet.

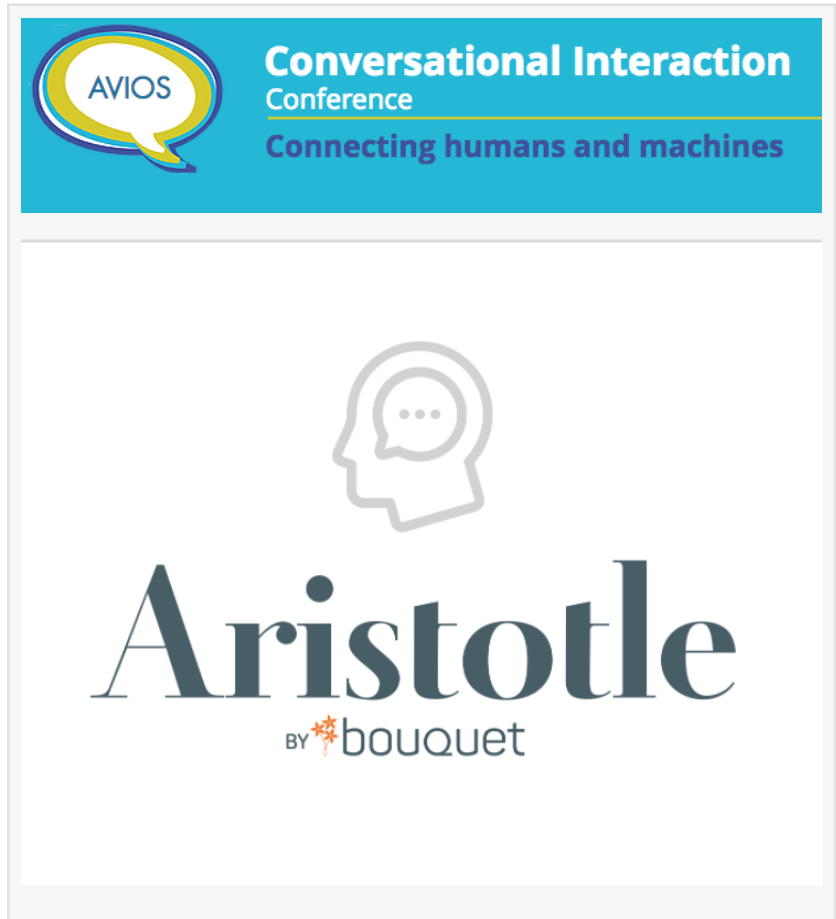

“

We are using technology to advance human capabilities to drive even better performance and outcome. Our team is very excited to see how the crowd responds to Aristotle.”

Marios Anapliotis, Co-Founder and COO

“We understand the massive volumes of work there is to be analyzed and how analysts play vital roles on an even larger project. Aristotle streamlines the way data is understood and received, creating more time for the rest of the parts of a project to be completed.

This conference is comprised of experts in their field. From major enterprises, such as Microsoft, Google, and Wal-Mart, to mid-tier companies and startups, they all aim to address the tools and advancements created during the technological boom that have provided new ways to communicate with one another and how to use these changes to increase revenue and cultivate buyer relationships. This event creates common

ground for like-minded innovators, entrepreneurs and experts to listen in on keynotes and panel discussions that highlight the challenges new technologies have created, how to best implement these changes for the most effective and efficient usability and a chance for companies to showcase their products all in the realm of conversational interaction.

“It’s really amazing how there is an entire conference focused on the over-arching theme of what we do,” says Marios Anapliotis, Co-Founder, and COO of Bouquet. “We are using technology to advance human capabilities to drive even better performance and outcome. Our team is very excited to see how the crowd responds to Aristotle.”

Find Adrien at the [World Government Summit](#) in Dubai February 11-13, 2018. This summit is comprised of the world’s most influential members of government, thought-leaders, and innovators, spearheading the conversation of technology and human development on a global scale.
