

More than 2,000 clients have purchased IT Governance's ISO 27001 documentation toolkits to support ISMS implementation

ELY, UNITED KINGDOM, February 2, 2018

/EINPresswire.com/ -- IT Governance, a global leader in cyber security expertise and solutions, is proud to have provided more than 2,000 clients with the best tools to help implement an ISO 27001-certified information security management system (ISMS).

Alan Calder, the founder and executive chairman of IT Governance, said: "Article 32 of the General Data Protection Regulation (GDPR) is the primary provision requiring technical measures to protect data. Although it gives examples of security measures and controls, the Article does not provide detailed guidance on how to achieve this.

"With 172 requirements and 114 controls to sift through, there's no doubt that it can be very challenging to keep a handle on all the practicalities of implementation. IT Governance is proud to have been able to help more than 2,000 clients manage a heavy ISMS workload timely and economically with our [ISO 27001 documentation toolkits](#)."

IT Governance's ISO 27001 documentation toolkits contain fully customisable templates that have been written and field-tested by expert consultants, and are guaranteed to be both time- and cost-efficient throughout the entire ISMS implementation process. Using pre-written templates can also significantly reduce errors and act as guidance for achieving ISO 27001 certification.

The [ISO 27001 ISMS Documentation Toolkit](#) is proven to help you implement an ISO 27001-compliant ISMS in less than six months by providing all the mandatory and supporting documentation. Not only is this more cost-effective than consultancy fees but there is also additional help and support available throughout the project. The toolkit has been developed by ISO 27001 experts, fully complies with ISO 27001:2013 and comes with 12 months' support.

"The IT Governance toolkit templates were helpful in saving us a great deal of time ... I would recommend using these if your aim is to satisfy the requirements efficiently and effectively," said customer Greg Wright, after using the ISO 27001 ISMS Documentation Toolkit.

To learn more about ISO 27001 and discover the best solutions to your cyber security challenges, IT Governance offers a variety of certified training courses, security testing services, books, toolkits, software and consultancy services.
