The most promising app developers of 2018

AppFutura has made a list of the most promising mobile app development companies worldwide that clients need to keep in mind for their projects.

BARCELONA, SPAIN, SPAIN, February 2, 2018 /EINPresswire.com/ -- The new year has been going on for a few weeks now and on AppFutura we have worked on a list of the most promising mobile app development companies of 2018.

In 2018, there will be different mobile app development trends to follow. These trends include Internet of Things app development, as well as wearable apps and Accelerated Mobile Pages (a project developed and implemented by Google with a huge implementation already). Other mobile app development trends that should be on the 2018 strategy of the most promising app development companies listed here are: mobile payments, Augmented Reality, Enterprise apps, On-Demand apps, Cloud-based apps, Android Instant apps, app security, Artificial Intelligence and the lazy loading technology to prevent the increase of bounce rates while loading the pictures once the text is fully loaded.

LeewayHertz
