Elephantiasis (Lymphatic Filariasis)

Elephantiasis is invoke as blood sucking infection that causes extreme swelling in the arms and legs. The disease is transmitted from human to human via the female mosquito when it takes a blood meal. The parasite grows into an adult worm that lives in the lymphatic system of humans.

Infection is usually acquired in childhood causing hidden damage to the lymphatic system. Lymphatic filariasis is caused by infection with parasites classified as nematodes (roundworms) of the family Filarioididea. Symptoms include swelling, shaking chills, sweating, headaches, and vomiting. Treatment includes antibiotics.

Elephantiasis (Lymphatic Filariasis) Industry Major Highlights:

Elephantiasis (Lymphatic Filariasis) - Pipeline Review, H1 2018, provides comprehensive information on the therapeutics under development for Elephantiasis (Lymphatic Filariasis) (Infectious Disease), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and

latest news and press releases.

The report further guide in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Elephantiasis (Lymphatic Filariasis) (Infectious Disease) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. Apart from this various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Major Outlook of Elephantiasis (Lymphatic Filariasis) Report:

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

- The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.
- The pipeline guide reviews key companies involved in Elephantiasis (Lymphatic Filariasis) (Infectious Disease) therapeutics and enlists all their major and minor projects.
- The pipeline guide evaluates Elephantiasis (Lymphatic Filariasis) (Infectious Disease) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.
- The pipeline guide encapsulates all the dormant and discontinued pipeline projects.
- The pipeline guide reviews latest news related to pipeline therapeutics for Elephantiasis (Lymphatic Filariasis) (Infectious Disease).

The pipeline guide provides a snapshot of the global therapeutic landscape of Elephantiasis (Lymphatic Filariasis) (Infectious Disease).

- The pipeline guide reviews pipeline therapeutics for Elephantiasis (Lymphatic Filariasis) (Infectious Disease) by companies and universities/research institutes based on information derived from company and industry-specific sources.

Competitive Analysis for Elephantiasis (Lymphatic Filariasis)

Key players are making innovative developments in Elephantiasis (Lymphatic Filariasis) industry. The same will help in improving the market performance. Heavy investments are made by major players in the R&D sector.

The key players in this market are: AbbVie Inc and Eisai Co Ltd
