Following the acquisition of NuVision Engineering, Inc. ([www.nuvisioneng.com](http://www.nuvisioneng.com)) by Carr's Engineering (US), Inc. (the US holding company of Carr's Group plc.), the Board of Directors is pleased to announce the following promotions.

Brian Scott Beley is promoted to the position of President and CEO.

Brian joined NuVision Engineering in 2002. Brian's previous position was Vice President responsible for the NuVision Utilities and Industry Business Segment. Prior to coming to NuVision Brian held successful executive management positions with Marconi and Westinghouse.

Martin C. Williams is promoted to the position of Chief Operating Officer.

Martin previously held the position of Vice President, responsible for the Decommissioning and Waste Management Segment of the business. Martin joined NuVision in 1998 as Manager of Advanced Process Systems, after a 10 year career in engineering and project management with AEA Technology.

Lisa Donovan is promoted to Company Controller.

Lisa has been with NuVision for 23 years serving in a multitude of accounting and finance responsibilities.

NuVision is a technology and applications engineering company focused on providing value in commercial nuclear and power plant facilities, government waste remediation facilities and waste clean-up. Its customers include the US Department of Energy, major nuclear energy suppliers, public utilities, and international governments. NuVision's corporate office is in Pittsburgh, PA with an Engineering and Test facility in Mooresville, NC.

Brian Beley appointed CEO of NuVision Engineering

Carr's Group plc is an international leader in manufacturing value added products and solutions, with market leading brands and robust market positions in Agriculture and Engineering, supplying customers in 50 countries around the world.

Its Agriculture division manufactures and supplies feed blocks for livestock, farm machinery and runs a UK network of rural stores, providing a one-stop shop for the farming community. Its Engineering division designs and manufactures bespoke equipment for use in the nuclear, petrochemical, oil and gas, pharmaceutical, process and renewable energy industries, including robotic and remote handling equipment.
