

# Package Nexus Now Offers REFRIGERATED SMART LOCKERS

*Package Nexus, the pioneer of Smart Lockers 2.0 introduced refrigerated lockers to keep groceries fresh. Future of online grocery shopping has arrived.*

LA JOLLA, CA, US, February 6, 2018 /EINPresswire.com/ -- Package Nexus (<http://packagenexus.com>), the technology leader and provider of Intelligent Parcel Lockers to Grocery Stores, Retailers, College Campuses, Multifamily Properties, and Corporate Office Buildings has added [refrigerated lockers](#) to its suite of [Smart Lockers 2.0](#).

Refrigerated package lockers have recently been very popular, spurred by the increase in deliveries of meals from local grocery stores, and companies such as Hello Fresh, Blue Apron, Amazon's Prime Now, and Instacart.

Multifamily communities are beginning to add these temperature-controlled smart package lockers to the banks of smart lockers that make perishable package delivery to multifamily housing doable and manageable.

We are now experiencing high demand for refrigerated lockers which is driven by growing popularity of online grocery sales, that the research made by IBISWorld estimated to reach \$9.4 billion a year. Grocery shopping has never been easier or more convenient, the Package Nexus Smart Lockers are available 24/7 for customers to pick up their grocery's at their earliest convenience. Customers simply order online and have their fresh groceries delivered to the refrigerated lockers for later pickup and that's it! An email/text will be sent to the customer with locker access code details once goods are ready for pickup. How convenient is that!

These temperature-controlled smart package lockers are cooled down to between 34 and 44 degrees Fahrenheit, allowing perishable food, beverages, and drugs to stay fresh for a longer period of time. Delivery people can choose between regular or refrigerated lockers when delivering a package or groceries. Our refrigerated lockers are specifically engineered to maintain a constant temperature for highly secured and well preserved fresh food storage.

Package Nexus typically installs the temperature controlled smart lockers as part of locker systems that also include conventional, not temperature-controlled lockers. The desired temperatures are set on a column-by-column basis and a column can consist of anywhere from two large lockers up to four medium sized lockers.

The key to our successful temperature-controlled lockers is combining a proven, and secure smart locker system with a suite of advanced software allowing for complete scalability, high availability and redundancy to be used by on-line or traditional retailers, parcel delivery companies and customers.

Package Nexus is the only intelligent locker company that offers 100% Smart Technology backed by 6

pending patents that effectively eliminates system errors, user errors, and challenges the customers of other parcel delivery systems are facing everyday.
