About [Marine Sealants](#)

Sealant is a substance used to block the flow of fluids from joints or openings in materials. It is a type of mechanical seal that can be used above and below the waterline in marine applications.

Sealants used in marine applications block the passage of air and water between two or more surfaces. They

provide adhesion to surfaces and protect them from vibrations, electrolysis, and noise.

Technavio's analysts forecast the global marine sealants market to grow at a CAGR of 6.14 % during the period 2018-2022.
