

# Startup Grind names N2N Services as one of the Top 50 Companies in the 2018 Global Startup Program

DULUTH, GEORGIA, USA, February 8, 2018 /EINPresswire.com/ -- [N2N Services Inc.](#) was inducted into the 2018 Class of Startups by Startup Grind. The Startup Program recognizes the Top 50 companies selected from 115 countries and 400 cities around the world to exhibit at Startup Grind Global 2018.

We strongly believe that our products enable businesses and organizations of all sizes to securely share their data through a flexible and secure SaaS platform.”

*Kiran Kodithala, CEO of N2N Services*

N2N Services Inc. is a technology company that provides data integration solutions, with a focus on turnkey Enterprise API development, API security, and API Integration. N2N's vision is to enable a secure and holistic cloud integration so that organizations worldwide can "plug in" cloud applications with their enterprise data. N2N's flagship product, Illuminate, enables this turnkey integration by providing a completely SaaS Cloud Integration Gateway. Illuminate's intuitive and affordable SaaS platform enables customers to build, transform, virtualize, share, secure, and monetize their APIs in minutes. Illuminate also enables customers to build bridges

between multiple APIs with no programming and no additional infrastructure.

“We are very excited to be recognized from among the thousands of startups vying for a spot on this list,” said Kiran Kodithala, CEO of N2N Services. “We are thrilled to launch Illuminate 2.0 at the Startup Grind Global Conference. We strongly believe that our products enable businesses and organizations of all sizes to securely share their data through a flexible and secure SaaS platform.”

"We started this program after seeing many of the Accelerators and Incubators not doing much to really help companies," says Derek Andersen, founder & CEO of Startup Grind. "We really wanted to make an actual difference in the startups trajectory and leverage all of our resources and network to their advantage."

Startup Exhibition companies are given access to Startup Grind's global audience through media, and onsite at the annual Global Event ([www.startupgrind.com/conference](http://www.startupgrind.com/conference)) held February 12th through February 14th in Redwood City, CA. The exhibition helps companies to accelerate their pace towards growth and success by gaining the visibility of mentors and investors inside the network.

"These startups have great teams, traction, technology and massive markets," says Andersen. "Our biggest goal is for each startup to go back home with a new and improved game plan that would not have happened without the exposure of the exhibition and the mentors/resources that were gained through our network."

N2N believes that secure and turnkey data Integration, powered by APIs (Application Programming Interfaces) is critical to the success of a modern enterprise. Enterprises of all shapes and sizes need

APIs to support integration with mobile applications, wearable devices, and customer portals. Modern enterprises are now using APIs to support real-time process automation, workflows, artificial intelligence, and analytics.
