

# Bitcoiin B2G's Comprehensive Trading Platform

*Bitcoiin B2G's architecture provides a complete coin solution with its own wallet, its own mining machines, and its own trading platform.*

HONG KONG, CHINA, February 9, 2018 /EINPresswire.com/ -- [Bitcoiin B2G](http://www.bitcoiin.com), [www.bitcoiin.com](http://www.bitcoiin.com), is providing new details about its new trading platform, as part of B2G's Initial Coin Offering (ICO). This new ICO offers Bitcoiin B2G, a [second-generation cryptocurrency](#), at a pre-hard cap discount. But, unlike the original bitcoin, Bitcoiin B2G has been built to accommodate all the needs of the cryptocurrency community – including buying, selling, trading and holding crypto tokens.

The architects of the Bitcoiin B2G ecosystem have realized a new vision, a one-stop solution for the cryptocurrency depositor, seller, trader and investor.

In a decentralized macrosystem like cryptocurrencies, this comprehensive approach is unique. Whole industries focus on buying (like the original bitcoin), selling and trading (like coinbase.com or its many competitors), and holding for long-term value increase (wallets, hard and soft).

The architects of the Bitcoiin B2G ecosystem have realized a new vision, a one-stop solution for the cryptocurrency depositor, seller, trader and investor. Our new Bitcoiin B2G landing page routes our clients to the sector they want to access—to buy, sell, trade or hold tokens.

We call this feature of Bitcoiin B2G “self-sustaining.” This second-generation architecture, derived from the shortcomings of the original bitcoin, provides a self-sustaining cryptocurrency, a complete coin solution with its own wallet, its own mining machines, and its own trading platform. The trading platform implements exchange of Bitcoin B2G for popular altcoins (including bitcoin, Ethereum, ripple, etc.) or for fiat currencies.

Here's how it works. Once a user account has been set up, and Know Your Customer (KYC) information has been provided to the platform, a deposit of Bitcoiin B2G opens a door to all the curtains inside Aladdin's cave. Dollars buy B2G; B2G tokens can be exchanged back into dollars, or for Euros, or for other national fiat currencies. B2G holdings can be traded for original bitcoin or other altcoins. Or, for those who want to produce B2G ab initio (from the beginning), our trading platform accommodates deposits into special mining pool accounts. These deposits are applied to the process of mining B2G from our Ethereum-based blockchain hashing function.

“Bitcoiin looks like the next big thing.” --Johnny Chen, CEO of Dragon Mining

A Unique Opportunity

Cryptocurrency enthusiasts, depositors and adventurers have seldom had such a chance to participate in the exhilarating launch of an integrated cryptocurrency ecosystem, with built-in controls, strong management and explosive upside growth potential.

We announce the second generation of cryptocurrency. Seldom does life grant a second chance.
