[Wafer Mounter Equipment Market 2018](#)

Wafer mounters are a part of the wafer fabrication process. After wafer grinding is carried out, the wafer is mounted on a metal frame for film or tape to be applied to it. This process is called wafer mounting. This becomes an essential step in the overall fabrication process as the film or tape reduces particulate contamination, thereby ensuring a highly efficient semiconductor device or component.

The analysts forecast the global wafer mounter equipment market to grow at a CAGR of 4.42% during the period 2017-2021.
