

Angular Detailing of DUSK North American White Oak Adds Complexity to NYC Lobby

Design Republic added complexity and warmth to the 155 W 23rd corporate lobby with three-dimensional construction of DUSK wall cladding.

TELFORD, PENNSYLVANIA, UNITED STATES, February 12, 2018 /EINPresswire.com/ -- In the Chelsea neighborhood of Manhattan, [155 W 23rd street](#) is warm and welcoming yet decidedly modern. The use of [DUSK north american white oak](#) contrasts the bright lighting and earthy green logo. While the lobby is compact, it feels much larger with the compelling angles of the three-dimensional white oak feature wall.

Upon walking in the front door of the commercial property, one immediately notices the green “155” beside circular cut outs of the same color. Simple but striking, the color scheme also utilizes gold trim around the elevator doors and framing the white oak cladding.

The one complexity of the lobby is the construction of the feature wall. A direct contrast to the light-colored, flat wall on the opposite side of the room, the angular wall is made from DUSK white oak and features three-dimensional convex and concave shapes.

DUSK is an original cut white oak with a textured surface. Original cut is a way of cutting the log that incorporates plain sawn, rift sawn and quarter sawn grain patterns and all grades and character marks into the final product. DUSK is pre-finished with our hardwax oil which is natural, non-toxic and 100% VOC-free. our hardwax oil produces a durable, matte finish that respects the natural look and feel of the wood.

The North American White Oak wall and ceiling cladding from reSAWN TIMBER co. features wide plank wood cladding that is [CHARRED](#) or prefinished and available in solid & engineered construction. The North American White Oak products are made using domestic woods such as Rift & Quarter Sawn White Oak. These designs emphasize the natural color & beauty of these woods.

reSAWN TIMBER co. provides CHARRED and non-CHARRED new and reclaimed wood products for architectural specifications for interior wall and ceiling cladding. Our carefully curated offering includes modern finishes on reclaimed woods and newly harvested wood species. We provide only the highest quality materials milled to our exacting standards and finished in a way that enhance the natural beauty of the wood. Our extensive offering includes solid & engineered construction, CHARRED shou sugi ban, and FSC® woods. We specialize in meeting the needs of architects, designers and contractors, and providing superior service and guidance in developing your specifications. Our products can assist you in achieving your project goals in aesthetic, performance and sustainability

Design Republic is on a mission to foster strong, honest relationships with each of their clients to collaboratively create best-in-class work. This honest, process-driven approach is what enables them to be efficient and adaptable, and deliver impeccable design work every single time.
