

# Cloud Radio Access Network (C-Ran) Market 2018 - Industry Analysis, Size, Share, Strategies and Forecast to 2025

*Latest Report on Cloud Radio Access Network (C-Ran) Market Global Analysis & 2025 Forecast Research Study*

PUNE, INDIA, February 15, 2018 /EINPresswire.com/ -- [Global Cloud Radio Access Network \(C-Ran\) Industry](#)

Latest Report on Cloud Radio Access Network (C-Ran) Market Global Analysis & 2025 Forecast Research Study

The report covers the analysis and forecast of the cloud radio access network (C-RAN) market on global as well as regional level. The study provides historic data of 2016 along with the forecast for the period between 2017 and 2025 based on revenue (US\$ Mn).

The study provides a detailed view of the cloud radio access network (C-RAN) market, by segmenting it based on by component, by end user, by service and regional demand. Cloud radio access network or C-RAN is an advanced way of cellular network architecture. Cloud radio access network supports 2G, 3G and 4G network and is mainly for mobile network infrastructure. C-RAN is a wireless communication technology. The rise in the growth of mobile data trafficking is the key factor behind the growth of this market. Moreover, in coming years, cloud radio access network is assumed to grow at a rapid rate with increasing investment from entire telecom and cloud ecosystem.

The report covers a detailed competitive outlook that includes the market share and company profiles of key players operating in the global market. Key players profiled in the report include Cisco Systems Inc., Nokia Corporation, ZTE Corporation, Samsung Electronics Co. Ltd., Intel Corporation, Ericsson, Huawei Technologies Co. Ltd.

Regional segmentation includes the current and forecast demand for North America, Europe, Asia Pacific, Middle East and Africa and Latin America. The segmentation also includes by component, by end user and service.

The competitive profiling of the key players in the global cloud radio access network (C-RAN) market across five broad geographic regions is included in the study. These include different business strategies adopted by the leading players and their recent developments.

A comprehensive analysis of the market dynamics that is inclusive of market drivers, restraints, and opportunities is part of the report. Additionally, the report includes potential opportunities in the cloud radio access network (C-RAN) market at the global and regional levels. Market dynamics are the factors which impact the market growth, so their analysis helps understand the ongoing trends of the

global market. Therefore, the report provides the forecast of the global market for the period from 2017 to 2025, along with offering an inclusive study of the cloud radio access network (C-RAN) market.

The report provides the size of the cloud radio access network (C-RAN) market in 2016 and the forecast for the next nine years up to 2025. The size of the global cloud radio access network (C-RAN) market is provided in terms of revenue. Market revenue is defined in US\$ mn. The market dynamics prevalent in North America, Europe, Asia Pacific, Middle East and Africa and Latin America have been taken into account in estimating the growth of the global market.

Market estimates for this study have been based on revenue being derived through regional pricing trends. Demand for cloud radio access network (C-RAN) has been derived by analyzing the global and regional demand for cloud radio access network (C-RAN) in each application for its respective functions. The cloud radio access network (C-RAN) market has been analyzed based on expected demand. Forecasts have been based on expected demand from cloud radio access network (C-RAN) applications. We have used the bottom-up approach to estimate the global revenue of the cloud radio access network (C-RAN) market, split into regions. Based on, by component, by end user, and service, we have summed up the individual revenues from all the regions to achieve the global revenue for cloud radio access network (C-RAN). The application split of the market has been derived using a bottom-up approach for each regional market separately, with the global application segment split being an integration of regional estimates. Companies were considered for the market share analysis, based on their innovation and application and revenue generation. In the absence of specific data related to the sales of cloud radio access network (C-RAN) several privately held companies, calculated assumptions have been made in view of the company's penetration and regional presence across all applications.

The global cloud radio access network (C-RAN) market has been segmented into:

Global Cloud radio access network (C-RAN) Market: By Component

- Remote Radio System
- Test & Measurement Equipment
- Baseband Unit
- Server
- Processor
- Optical Transport Unit

Global Cloud radio access network (C-RAN) Market: By End User

- Defense & Military
- Retail
- Healthcare
- Government
- BFSI
- Manufacturing
- Media & Entertainment
- Transportation & Logistics

Global Cloud radio access network (C-RAN) Market: By Service

- Network Service
- Custom
- System Integration

Global Cloud radio access network (C-RAN) Market: By Geography

- North America
  - o U.S.
  - o Canada
  - o Mexico

- Europe
  - o U.K.
  - o France
  - o Germany
  - o Italy
  - o Netherlands
  - o Rest of Europe
- Asia Pacific
  - o India
  - o China
  - o Japan
  - o Australia
  - o New Zealand
  - o Rest of Asia Pacific
- Middle East and Africa
  - o GCC
  - o South Africa
  - o Rest of Middle East and Africa
- Latin America
  - o Chile
  - o Brazil
  - o Rest of Latin America
