About [Medical Adhesive Tapes](#)

Medical adhesive tapes, also known as surgical adhesive tapes, are used for closing wounds and holding bandages in place. They are available in a variety of widths, lengths, and styles and are designed to meet a wide range of bandaging requirements. Medical tape is an essential first aid product. Some medical adhesive tapes are prepared with zinc oxide to reduce the risk of infection. They are designed in a way that allows air circulation around the wound. Acrylic, silicon, rubber, PET (polyethylene terephthalate), PE (polyethylene) are various types of resins used in the preparation of medical adhesive tapes. Silicon resin usage is increasing due to increased applications in the stick-to-skin medical products.

Technavio's analysts forecast the global medical adhesive tapes market to grow at a CAGR of 5.56% during the period 2017-2021.
