Latest Report on Aquaculture And Fisheries Market Global Analysis & 2022 Forecast Research Study

Global Aquaculture and Fisheries market is accounted for \$162.68 billion in 2015 and is expected to reach \$235.64 billion by 2022 growing at a CAGR of 5.5%. The growth in the market is due to rise in consumer awareness about health benefits of fish. In addition, the market demand is expected to be further fuelled by the lack of naturally available varieties owing to extensive fishing. However, Rice-fish culture exclusively performs as the key growth opportunity to the market.

Among the species segment, carps accounted for the largest market share and demand for carps is expected to rise, as it is one of the prime cultivated fish due to its high compatibility with non-ideal environmental conditions and its extensive use in fish farming. Moreover, Asia Pacific is expected to be the dominant market with china being the largest market for aquaculture, accounting for more than half of global market share. The market is expected to show rapid growth due to favorable climatic conditions for aqua farming, availability of resources and labor. South America is expected to expand its presence in the global aquaculture industry. Healthy growth line with the modest expansions expected in aquaculture production is expected from the more developed markets of Europe and North America.
