

Post-Operative Pain - Drug Profiles and Pipeline Review, H1 2018

PUNE, MAHARASHTRA, INDIA,
February 20, 2018 /EINPresswire.com/ --

WiseGuyReports.com with their unique quality of simplifying the market research study, presents a deep diving study report "Post-Operative Pain - Pipeline Review, H1 2018"

Post-Operative Pain

Overview

Pain is one of the main postoperative adverse outcomes causing distress to patients. Degree of postoperative pain experienced by individuals varies. Cause of pain includes peripheral nerve damage during surgery, inflammation at the site of the wound and damage to bodily tissues during surgery.

Risk factors include site of the operation, age, level of fear or anxiety, surgical procedure, personal preference and response to agents given. Treatment for post-operative pain includes analgesia and anesthetics.

Post-Operative Pain Industry Major Outlook

Pharmaceutical and Healthcare latest pipeline guide Post-Operative Pain - Pipeline Review, H1 2018, provides comprehensive information on the therapeutics under development for Post-Operative Pain , complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Post-Operative Pain (Central Nervous System) pipeline guide also reviews of key players involved in therapeutic development for Post-Operative Pain and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies /Universities /Institutes, the molecules developed by Companies in Pre-Registration, Filing rejected/Withdrawn, Phase III, Phase II, Phase I, IND/CTA Filed, Preclinical, Discovery and Unknown stages are 5, 1, 8, 18, 8, 1, 21, 3 and 3 respectively. Similarly, the Universities portfolio in Phase III and Preclinical stages comprises 1 and 1 molecules, respectively.

Post-Operative Pain pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage.

Post-Operative Pain - Competitive Analysis

Key players are making innovative developments in Post-Operative Pain industry. The same will help in improving the market performance. Heavy investments are made by major players in the R&D sector

Scope

The pipeline guide provides a snapshot of the global therapeutic landscape of Post-Operative Pain.

The pipeline guide reviews pipeline therapeutics for Post-Operative Pain by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Post-Operative Pain therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Post-Operative Pain therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Post-Operative Pain.
