

Global Vertigo Market Competition by Manufacturers Opportunities and Forecast To 2021

PUNE, MAHARASHTRA, INDIA,
February 21, 2018 /EINPresswire.com/ --

SUMMARY

WiseGuyReports published new report, "Global Vertigo Market"

Vertigo is a medical condition where a person feels as if they or the objects around them are moving when they are not. Often it feels like a spinning or swaying movement. This may be associated with nausea, vomiting, sweating, or difficulties walking. It is typically worsened when the head is moved. Vertigo is the most common type of dizziness. The causes for vertigo can be divided into two categories: Peripheral and Central. Peripheral is linked to the inner ear whereas central is linked to problems in Central Nervous System.

Peripheral vertigo can be further segmented into five major categories: Benign paroxysmal positional vertigo (BPPV), Acute Unilateral Vestibulopathy, Meniere's disease and Vestibular Schwannoma. Amongst all the stated indication, Meniere's disease represents the largest growth opportunity for the market players with its continuously rising incidence.

Peripheral vertigo can be further segmented into five major categories: Benign paroxysmal positional vertigo (BPPV), Acute Unilateral Vestibulopathy, Meniere's disease and Vestibular Schwannoma. Amongst all the stated indication, Meniere's disease represents the largest growth opportunity for the market players with its continuously rising incidence.

Growth of global vertigo market is expected to be driven by factors such as rising incidence and prevalence of peripheral etiologies of vertigo, increasing geriatric population, growing healthcare expenditure and improving disposable income. Further, the market growth could be hindered by side effects of currently prescribed medication, the high cost of treatment and tedious drug approval process. The key trends for the market include extensive research & development and different approaches being adopted by drug manufacturers in order to target vertigo.

A key drug Otividex, which is currently in third phase of clinical trials and is being developed by Otonomy Inc., is discussed in the report. The drug is easier to use and provides a higher and sustained concentration of dexamethasone relative to existing injections. Further, it is anticipated to provide a well-accepted treatment option for Meniere's Disease, if successfully developed.

The report "Global Vertigo Market: Industry Analysis & Outlook (2017-2021)" analyzes the development of this market, with focus on Europe and US regions. The major trends, growth drivers
