

Store Share Access, SSA Roofing CRM, Spotlights Internal Canvas Map Technology for Roofing Companies

SSA, Roofing CRM showcases internal canvas map technology for roofing companies for easy canvassing work.

BATON ROUGE, LOUISIANA , UNITED STATES , February 22, 2018

[/EINPresswire.com/](#) -- [Store Share Access](#) (SSA), LLC announces its

internal canvas map technology--an innovative improvement for its roofing customer relationship management (CRM) system. With this unique, built-in

enhancement, SSA continues to demonstrate its expertise in delivering affordable and accessible roofing [CRM technology](#) that's simple to use.

Louisiana-based Store Share Access (SSA) LLC enhances its eponymous roofing [CRM system](#) with proprietary canvas map technology. This unique technology is built into SSA and expands on its features for client mapping, including alerts and company files. SSA uses its internal canvas map technology to enhance its client mapping feature by leveraging Google maps to help roof contractors quickly identify project locations regardless of the device they use. This allows roofing contractors to map jobs and leads while continuing to manage projects and clients with ease.

“

At SSA we believe a true roofing CRM should connect the roofing company to their client, not just manage documents and pictures”

Chuck Magee

“At SSA we believe a true roofing CRM should connect the roofing company to their client, not just manage documents and pictures,” says Chuck Magee, SSA owner.

Convenience and Continued Innovation

Being able to use a roofing CRM system that does more than simply store files or manage projects is vital for roofing construction companies to streamline their business processes. That's why SSA makes it a central focus to concentrate efforts on enhancing these two key areas of roofing construction with its unique internal canvas map technology. CRMs for roofing appear frequently on the market, and SSA continues to evolve its technology to set itself apart. This unique canvas map technology facilitates many of SSA's features, including the client mapping feature. Roof contractors can gather information on neighborhoods following a storm and even map closed files with client mapping, and they can manage it all in one place.

SSA makes it easy for users to access all their files from one central location within their roofing CRM, and its internal canvas map technology is helping to improve the process. To learn more about SSA and its innovative products, please visit the SSA website.

About Store Share Access (SSA)

SSA was designed and is sold and supported by roofers who have been in the roofing construction industry for many years. SSA is simple to use with no complex software to learn. SSA is accessible and works on any device from anywhere. SSA is affordable with one low monthly price no matter how many users a company adds. Store Share Access, the roofing industry's best friend in a CRM.
